

FOOTPATHS

No major issues have been reported.

Most of the footpaths are currently in good condition at the time of writing.

Thanks to a resident donating a large quantity of woodchip, our band of willing volunteers have transported and spread it along sections of footpaths 4 and 10.

Thankfully other landowners and volunteers have cut many of the other paths and hedges, making them easily accessible.

Following a request to Suffolk County Council, they have agreed to repair or replace a number of footpath posts and signs which have either rotted or broken. No date for this has been given as yet.
