**Subject:** Re: Parkers Pitches - Michael Walton

Good afternoon Michael,

Thank you for your email.

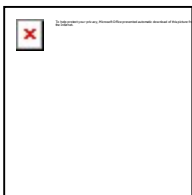

Please see prices below for treatment of 1 acre site:

- Scarification £300+VAT (all arisings must be left on site - these are usually piled along a hedge or fence line)
- Weed control spray £250+VAT
- Aeration £320+VAT

Please note, the window for weed spraying is rapidly shrinking. For best results we would recommend scarifying and weed spraying in the spring to ensure the ground has the conditions to recover. Further, the ground is currently too hard to aerate, but this can be done in late October/early November providing we see some rain.

If you have any questions at all please do let me know.

All the best,  
Lydia Parker

**Please note: I am on maternity leave, and may take longer to respond to emails.**
